Principal Investigator: Some Person

Postal Address: Somewhere on Earth
The Universe, zip code: 99999

E-mail Address: someone@someplace.earth.universe

Telephone Numbers: 123-456-7890
Fax number: 098-765-4321

Additional Investigators: Some Other Person

Program: Extensive Search For Aliens

1) Summarize in two or three sentences the aim of the program.

This is a continuation of an on-going program to identify aliens home planets in our galaxy.

2) Observing runs requested for this project:

<table>
<thead>
<tr>
<th>Run</th>
<th>Telescope</th>
<th>Instrument(s) &amp; Detector(s)</th>
<th>Nights</th>
<th>Days</th>
</tr>
</thead>
<tbody>

Max Days From New Moon | Range of Optimum Dates | Range of Acceptable Dates
---|-----------------------|--------------------------
1 | Dark | October | October - December |
2 | Grey | December | |
3 | Grey | January | January - February |
4 | Grey | February | |

3) Dates you cannot use for non-astronomical reasons:
1 - 15 November, We're on a moon vacation.
4) **Scientific Justification, Part I:** State concisely the background, purpose and significance of the program, and what you hope to accomplish. Please include references to previous work in this field by yourself and by others. Copies of unpublished preprints referenced would be appreciated.

   Just because!! Or: because they are there.
5) **Scientific Justification, Part II:** Detail your plans for obtaining, reducing and analyzing the data. You should try to sketch a plausible path from the telescope to the goals outlined on the previous page. If the program is a *continuation* of one previously approved, begin with a *progress report.*

The location of each source will be imaged and a spectra will be taken in order to detect aliens.

6) **Justify the amount of time requested:** (e.g. number of objects and exposure time per object). List the objects, positions, magnitudes and other properties defining the observational program.
7) Previous allocations of telescope time: Allocations of all telescope time (at Wise and elsewhere) during the past two years. Indicate current disposition of data, publications completed (give references) or in preparation, or any additional information you consider relevant. The Scheduling Committee is interested in both experience and the effectiveness with which previous time has been used.

8) Auxiliary equipment and special software requirements: Please detail filter, diskette or magtape requirements. If you plan to use the 2* Photometer, specify the type of data acquisition program and photomultiplier required. If you require any special instrumental or software support, no matter how trivial, please provide complete details.

9) Visitor Equipment: If you plan to bring your own equipment, you must attach to the Observing Time request form an additional page giving a detailed description of the equipment you would like to bring and how you plan to use it in connection with our telescope.

10) Students: The responsible faculty astronomer must indicate in a letter accompanying each proposal whether or not the student is planning to do the work for his/her dissertation, and also to certify that the student is in good academic standing and is capable of carrying out the program.
