Florence Nightingale Bicentenary Research Fellow and Tutor in Bioinformatics

The Florence Nightingale Bicentennial Fellowship and Tutor in Bioinformatics is a new fellowship at Oxford and we are recruiting to it with effect from January 2020 or as soon as possible thereafter. This is a rare and exciting opportunity to establish and sustain your own independent research programme of the highest academic standards within the Oxford Protein Informatics Group. You will join a dynamic and collaborative group and department, where our research is world-leading.

We need you to hold a relevant PhD/DPhil with post-qualification research experience and have a strong publication record. You must be able to demonstrate the ability to plan and manage research projects independently. You will be an effective teacher of a range of topics and will bring the excellent interpersonal skills necessary for undertaking teaching and pastoral duties.

Queries about this post should be addressed to Professor Charlotte Deane: deane@stats.ox.ac.uk or Professor Garret Morris: garrett.morris@stats.ox.ac.uk.

This post is fixed-term for 3 years, in the first instance.

Only applications received before 12.00 midday on 7 November 2019 will be considered. Interviews will be held on 22 November 2019.

More details can be found here

Please share with anyone who may be interested.

Should you have any questions please do not hesitate to contact me.

Best wishes
Charlotte

Professor Charlotte Deane

---

Professor of Structural Bioinformatics
Department of Statistics University of Oxford, 24-29 St Giles', Oxford, OX1 3LB
Head of the Oxford Protein Informatics group
