

Open Ph.D. position in the Madi Lab (www.asafmadilab.com). The lab is studying molecular signaling that occurs following immune cell interactions or immunotherapies within the **tumor micro-environment**. We are utilizing **single cell transcriptomic technologies** together with *in vitro* and *in vivo* experimental models hand in hand with **advanced computational methods**.

Please e-mail asafmadi@tauex.tau.ac.il

Best,
Asaf

Asaf Madi, Ph.D
